In the Baltic Sea: The BALTIC SEA. Road Crew Entertainment is working with different partners on their next big DLC, the largest truck simulator to date. The key news is that the game will include the three countries of Lithuania, Latvia and Estonia, parts of western Russia, the largest inland sea on Earth, the BALTIC SEA and numerous other countries in the surrounding region. The DLC has been developed by several independent developers with the focus of the content on the Far East region. However, the BALTIC SEA is by far the biggest and most complex project that has yet to be released in the game. It involves creating different islands, creating cities and updating the territory, with special attention to the main cities in the Baltic region, to the island Seskar, on which the game takes place. The area of the sea covers about 1,7 million square kilometers. "Our goal is not to create a game that is too realistic. Instead, we will give more chance for you to play with your own rules. Therefore, we also thought of adding more empty roads to see what happens there. In the DLC, all of our known networks of roads have been completely redesigned. Every road has been reconstructed from scratch", said Janis Strombergs, who took over the development of the new content of the title from his predecessor, Alexandrs Brocis. There will also be new routes, including new cities. In order to attract you, the developers of the game have included every city in the Baltic region, with a special focus on the largest cities. "We will add more cities in the Baltic region, not only for our fans, but also for us. The content is still in the early stages, but we'll do our best to add more cities in the near future. "In addition, we also want to introduce all of the major cities in the world to our fans, such as Moscow and

London”, said Janis Strombergs. There are many new and updated vehicle types. We also added new brands, to supplement the thousands 82157476af
